If the information on the application does not match what you are seeing, you can propose changes. This function exists in multiple areas of the application. The Facilities team will make updates based on your feedback for Description, Manufacturer, Model Number and Serial Number. Enter one or all areas and tap submit.

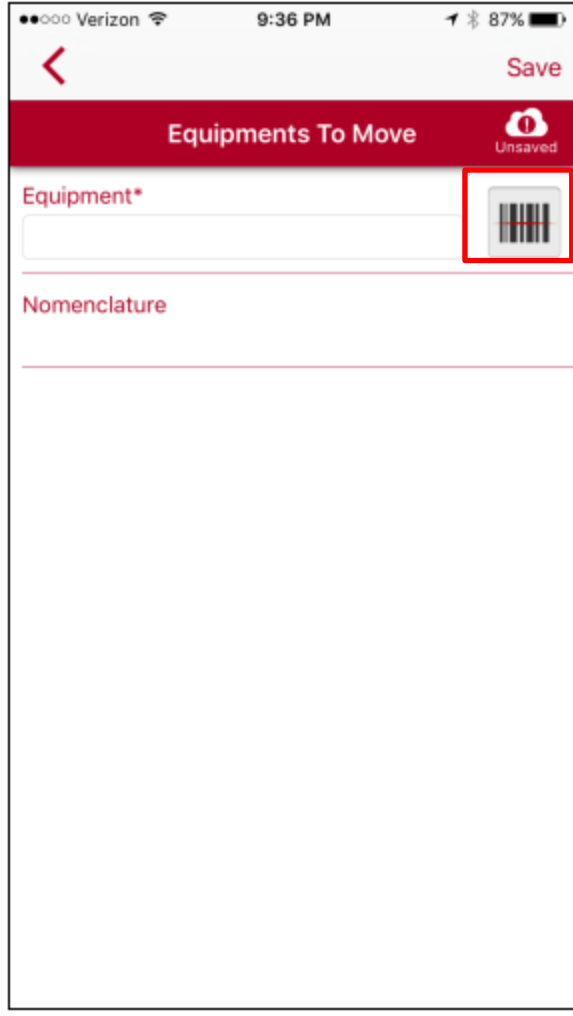

The mobile application search for equipment feature will also return the last 5 work orders on the selected tag. This information may help you understand what work has been done to this tag in the past, even if it has moved locations. You will be able to view work codes, resolution codes, notes and pictures that are attached to these work orders.

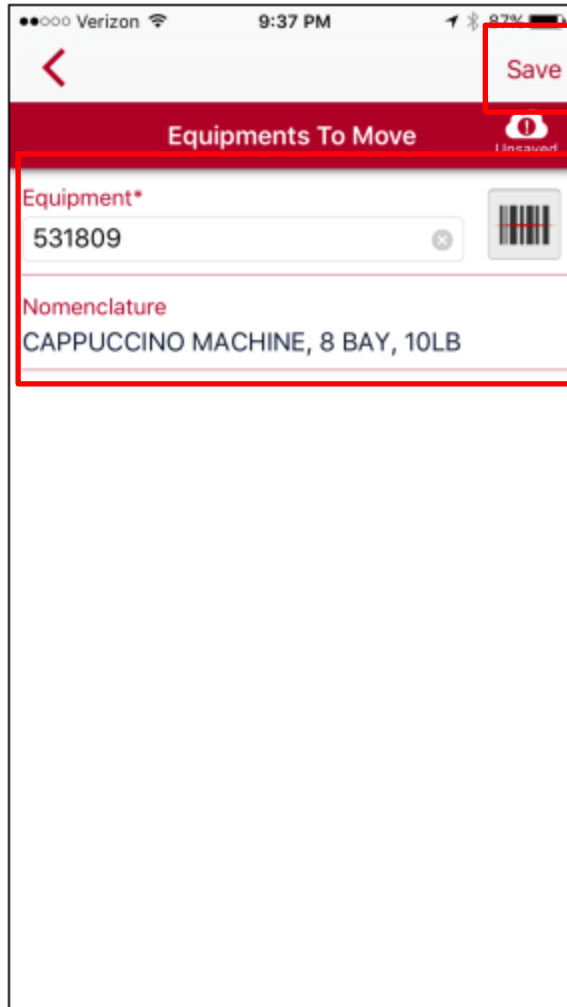

The equipment move feature utilizes the GPS technology in your device to transfer equipment from one location to another. This function will replace the need to send paper transfer sheets to Facilities.

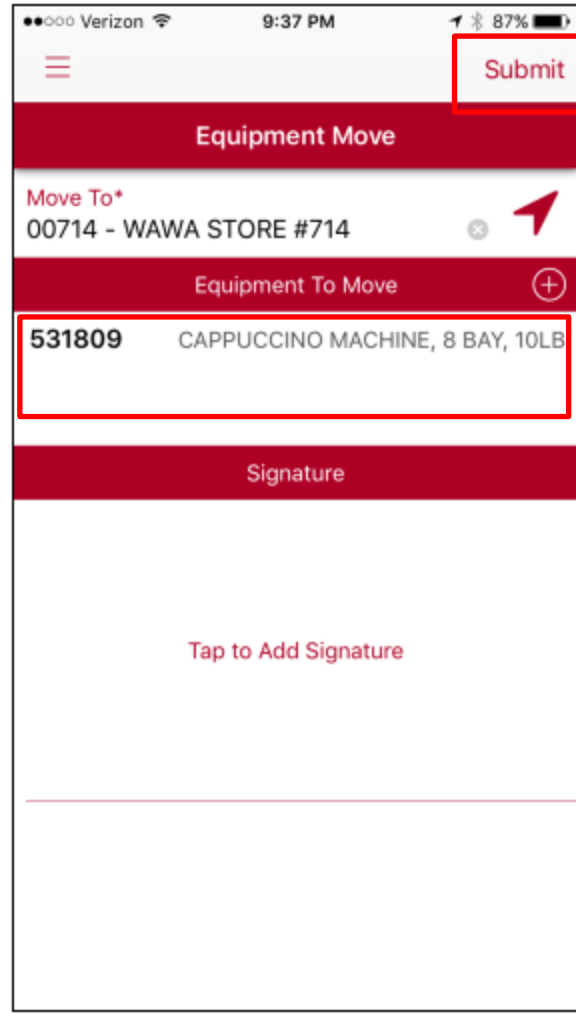

The move to location will auto populate based on the site that you are in. This function will not work unless you are at a valid site in our system. If you have warehouse locations that have not been communicated you will need to reach out to your vendor manager immediately. To begin the process, tap the plus sign.

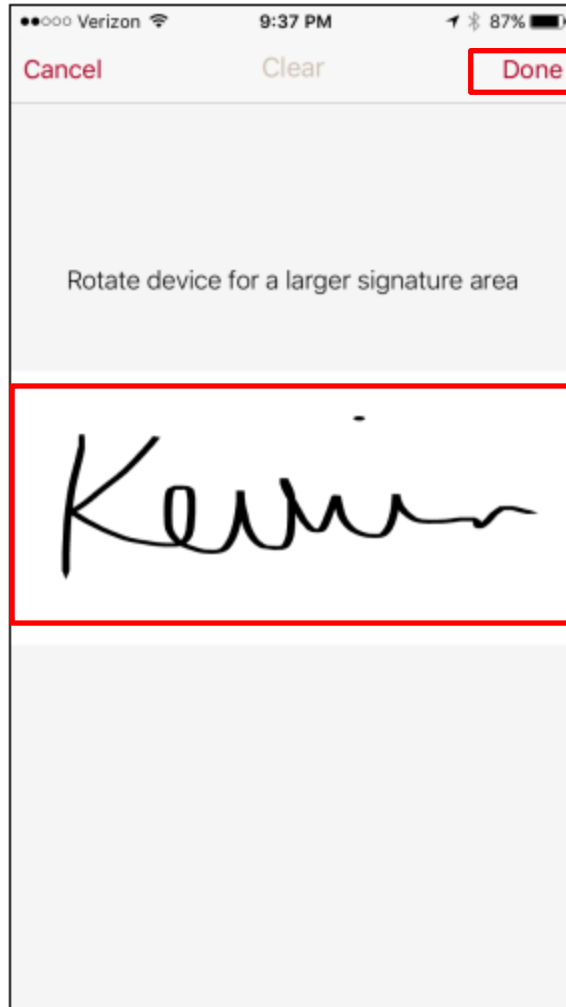

The barcode feature should be used for this function. Tap the barcode symbol and scan the tag associated with the piece of equipment.

The equipment number and description will populate on the screen. Tap save.

The information will display in the equipment to move box. If you have more than one piece of equipment to move you can repeat the above steps. When you are done adding equipment tap submit.

The move will require a signature. If you are delivering to a store, get the signature of the manager on duty if available. If you are delivering to a warehouse, get the signature of the person in charge of receiving equipment. Tap done when complete.

Equipment To Move

531809 CAPPUCINO MACHINE, 8 BAY, 10LB

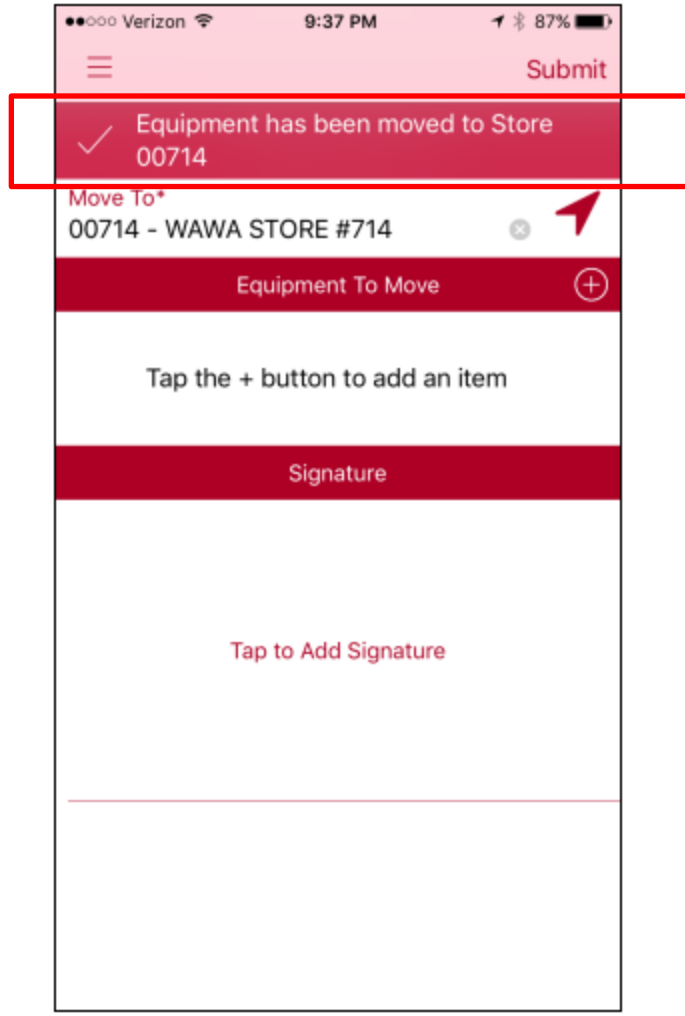

Signature

Edit Signature

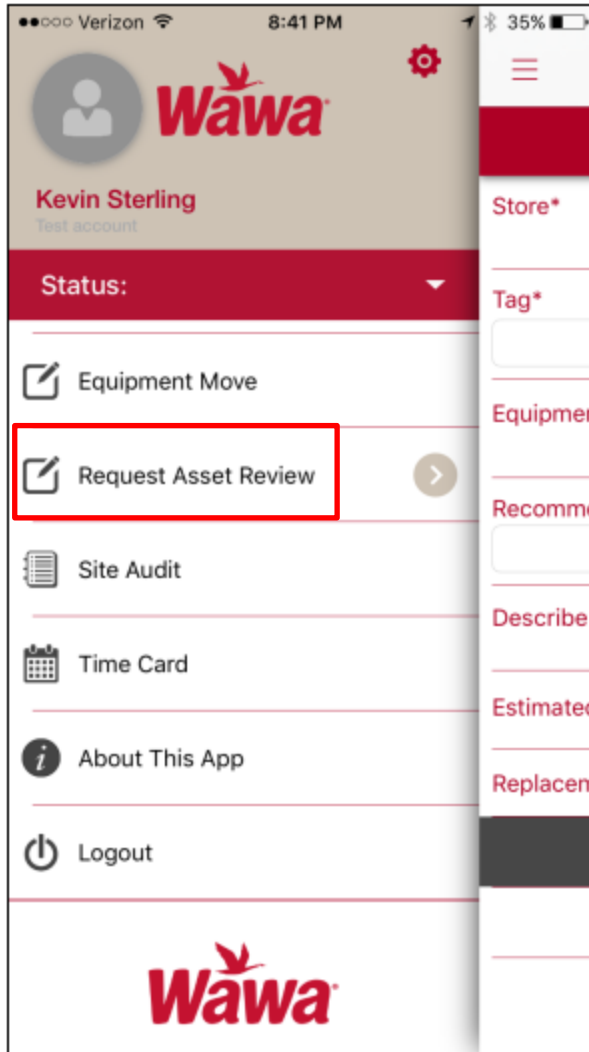

Kawin

Signed by sterlingkremco on 5/19/16 9:37 PM at 39.603,-74.8811

The signature and equipment to be moved will display on the screen. Tap submit if correct. The signature and the GPS stamp for the location are saved as records in the system.

The equipment has now been moved to the site and the transfer paperwork is complete.

The Request Asset Review feature was designed to help you communicate the condition of a piece of equipment to Facilities and ask for a recommendation for how to proceed.
